PRODUCT DESCRIPTION

H1 Hygiene pallet 1200x800x160 mm - with raised edge, Used

A used pallet made of high quality HDPE plastic. This pallet has an open deck with a raised edge. This raised edge ensures that plastic containers do not slide off the pallet. The dimensions are 1200x800x160 mm. This is the leading and most widely used pallet in the food industry, usable for transporting products of all shapes and sizes and easy to clean. The 3 solid skids carry the pallet with a maximum dynamic load of 1250 kg, a static load of 5000 kg and the load when placed in a rack is 1000 kg. This makes a very strong pallet that is suitable for carrying heavy loads and can be used excellently in the food industry or environments where hygiene is very important. These plastic pallets are export ready without any processing.

Packaging and pallets based on the collomodular Euro format (1200x800mm) ensure optimal use of space when used together for transport and storage.

PLEASE NOTE: This is a used item, all used items we sell are 100% functional! However, the photo that we display on the website does not guarantee the entire batch that we have in stock. The used products we sell have visible signs of use and wear and tear. Based on our more than 30 years of experience, we carefully sort and repair used items. Whether the optical and technical condition is sufficient for you is a personal interpretation. If you want to convince yourself that these articles meet your needs, you are welcome after making an appointment by telephone at one of our branches to view the selected product. By placing your order online, you agree to the condition of used products.
