Castors diameter mm	100
Status	Used
Outside dimension length	815
Outside dimension width	645
Outside dimension height	1730
Carry weight	500
Bottom	Metal
Product	used, for rent
Type	2-sided Roll containers

PRODUCT DESCRIPTION

Used nestable 2 sided roll container made of electrolytically galvanized metal with A-frame construction. Equipped with a gridded base and gridded side rails with textilestraps. The size of the side rails is 1480mm. The outside dimensions are 815x645x1730mm, the inside dimensions are 800x615x1480mm. The dynamic load capacity is 500kg. The roll container is provided with a collapsible base, so that the container takes up little space when it is empty. The roll container has a gridded metal base with 2 castors and 2 fixed castors. This makes the roll container very manoeuvrable and very user-friendly. The wheels are made of PU and therefore more durable than regular PP wheels. The nestable construction allows you to save space during return transport or when it is in storage and not in use.
