Outside dimension width	400
Outside dimension height	320
Carry weight	25
Volume	60
Product	new, for rent
Type	Nesting boxes, Distribution boxes, Boxes with lid

PRODUCT DESCRIPTION

Nestable, stackable plastic container with a 2-part hinged member. The container has the outside dimensions of 600x400x320mm and the inside dimensions of 540x367x302mm. The sidewalls and the base of the container are completely closed with a capacity of 60 litres. The carrying capacity of this tote box is 25 kg. And you can stack up to 4 loaded boxes on top of each other with the load capacity of the stack being 100kg. This box can be used within a temperature range or -20 °C to +40 °C. When the member is closed you can stack the boxes and when the boxes are empty they can be nested, saving you space during transport or storage. When nested the space-saving or these boxes is 74%. For transport and storage, it is the most efficient way to place 104 plastic containers on 1 pallet or 1200x900x2550mm. This way 3000 pieces fit in a trailer.
