Static load	7000
Dynamic load	1600
Racking load	900
Material	HDPE
Status	New
Product	new Pallets With Closed Deck, Pallets for high rack
Type	

## PRODUCT DESCRIPTION

### Plastic pallet 1200x800x145 mm - PE-PP Mix

This black pallet of 1200x800x145 mm has a dead weight of 15.2 kg, with a dynamic load capacity of 1600 kg. The pallet is equipped with three carriages, making it ideal for heavy loads. The raised edge reduces the chance of loads sliding off, ensuring safe storage and transport. With the three solid skids, this pallet is very strong and can be used immediately for export. This saves time, as you don't have to handle wooden pallets. What also makes this plastic pallet special is that the pallet is reinforced by means of metal tubes and can therefore be statically loaded up to 7000 kg.

### Plastic type of pallet

This pallet is made of PE-PP plastic, which is why the pallet is also suitable for humid environments. The closed deck makes it easy to clean the pallet thoroughly and dry it quickly. The temperature range of this plastic is from -40 °C to +70 °C.

### Transport and storage

The pallet has the dimensions of the collomodular Euro format (1200x800 mm), which ensures optimal use of space during transport and storage. In a standard

truck, 18 pallets can be stacked up to a height of 2600 mm, resulting in a total of 576 pieces per trailer.

## Accessories for Euro pallets

Our pallets can easily be converted into pallet boxes for optimal protection of your products. View the matching collars (1200x800 mm) and plastic lids (1200x800 mm) for this type of pallet here.
