Outside dimension height	115
Static load	700
Dynamic load	300
Material	HDPE
Status	New
Product	new
Type	Display pallets

PRODUCT DESCRIPTION

Small nestable display pallet 600x400x115 mm - open deck

Small plastic display pallet with a maximum static load of 700 kg and a maximum dynamic load of 300 kg. It is the lightest display pallet in its class, yet with a strong and stable structure.

The pallet is equipped with 4 hollow legs and a gridded top deck. Thanks to the hollow legs, the pallet is nestable, and nested pallets take up less space. Because these display pallets take up less space, they are also cheaper to transport. The dimensions of the display pallet are 600x400x115 mm. On a pallet space of 1200x800x2200 mm, you can place 192 of these display pallets.
