PRODUCT DESCRIPTION

Plastic Half Pallet - 800x600x160mm - 3 skids

This half-pallet is made of ultra-resistant HDPE plastic. Its design makes it ideal for storing heavy loads. Its dynamic load capacity is 1000kg and its static load capacity is 2000kg.

The protective edges increase the safety of the products stored and transported on the plastic pallet.

Thanks to its large load capacity and robust design, it is commonly used in pooling applications.

The half-pallet is resistant to insects, bacteria and fungi and is fully recyclable.
