### PRODUCT DESCRIPTION

## Plastic pallet 800x600x130mm - HDPE plastic

This black plastic display pallet of 800x600x130mm is relatively light with its 3kg weight. Nevertheless, this pallet can carry 1000kg dynamic and 2500kg static. In addition, this pallet is equipped with a raised edge to reduce the chance that cargo can slide off. Plastic pallets are very suitable for use on conveyor belts due to their precise dimensions and small margin of error. The low weight means that this pallet is also excellent for the aviation sector.

### Plastic type of pallet

The HDPE (Polyethylene) plastic that makes up this pallet is, in contrast to pallets made of PO (Polyolefins) plastic, very suitable for humid or even wet environments. This can of course be both indoors and outdoors. This pallet has a closed deck, which means that it can be easily cleaned through and through and dries relatively quickly. Ideal for, for example, the meat and fish processing industries. The temperature range of this type of plastic is -40 °C to +70 °C.
