### PRODUCT DESCRIPTION

## Racking plastic pallet 1200x800x150mm

Heavy plastic pallet racking, ideal for placement in racks, and heavy static load. The pallet is completely fabricated from HDPE, thus durable, and completely recyclable, the own weight of the pallet is 11kg. A strong pallet with a dynamic load capacity of 1000 kilograms, a maximum static load of 4000 kg and 500 kg when placed in a rack. The pallet is known for its strong design and the ability to carry heavy loads, this is because it is a mono-block plastic pallet which means he is out & eacute; & eacute; n piece is sprayed . The design of the pallet provides a safe and stable storage. The pallet of the upper deck is open and can be both with and without standing cuffs, the lower deck is made up of three slides. This pallet is often used in the supply chain, in high-rise warehouses, air

freight traffic, transportation by lorry and transport outside the EU.
