

Racking plastic pallet 1200x800x150mm - strengthens

SKU 28127

Extra-strong plastic pallet suitable for racking and heavy static load reinforced with metal. Dimensions are 1200x800x150mm. Pallet is entirely made of HDPE, and thus durable, the pallet is not porous and does not absorb fluids.

TECHNICAL DATA

Outside dimension length	1200
Outside dimension width	800
Outside dimension height	150
Static load	4000
Dynamic load	1000
Racking load	900
Material	HDPE
Status	New
Product	new
Type	Pallets for high rack

PRODUCT DESCRIPTION

Racking plastic pallet 1200x800x150mm - metal-reinforced

Extremely heavy-duty pallet racking plastic material, ideal for placement in racks with very heavy load. The pallet is completely fabricated from HDPE, thus durable, and completely recyclable, the own weight of the pallet is 14kg. A very strong pallet with a dynamic load capacity of 1000 kilograms, a maximum static load of 4000 kg and 900 kg when placed in a rack. The pallet is known for its strong design and the ability to carry heavy loads. This is because it is a mono-block plastic pallet which means that he is out é é. N piece is injection-molded, and thereby, the metal pipes 3 at the top deck for amplification The

design of the pallet provides a safe and stable storage. The pallet of the upper deck is open and can be both with and without standing cuffs, the lower deck is made up of three slides. This pallet is often used in the supply chain, in high-rise warehouses, air freight traffic, transportation by lorry and transport outside the EU.
