PRODUCT DESCRIPTION

Plastic pallet 1100x1100x140mm - PO plastic

This black plastic display pallet of 1100x1100x140mm is relatively light with its 11kg. Nevertheless, this pallet can carry 1500kg dynamically and 4000kg statically. In addition, this pallet is equipped with a raised edge to reduce the chance that cargo can slide off. Plastic pallets are very suitable for use on conveyor belts due to their precise dimensions and small margin of error. The low weight means that this pallet is also excellent for the aviation sector.

Plastic type of pallet

Pallets made of PO (Polyolefins) plastic have a relatively low own weight and have an excellent price/quality ratio. The material gives a smooth, shiny black finish. PO plastic consists of recycled materials and therefore ensures a lower impact on the environment. PO is less suitable for use in humid or wet environments and should therefore not be stored outdoors; Pallets made of HDPE and PP plastic are the right alternative for this. The temperature range of this type of plastic is 0 °C to +55 °C.
