**PRODUCT DESCRIPTION**

**Robust hygiene pallet 1200x800x155mm - HDPE plastic**

With a weight of 1200kg, this hygienic Euro-sized pallet of 800x155x18mm is extremely robust and therefore suitable for heavy work, especially in hygienic environments. That is why this pallet can carry 4000kg statically. The pallet has a completely flat upper deck with small raised edges on the outside, which ensures safe storage and

transport of goods. Plastic pallets are very suitable for use on conveyor belts due to their precise dimensions and relatively small margin of error. Due to its robustness, this pallet is suitable for various sectors: food, pharmacy and industrial use are no problem.

## Plastic type of pallet

The HDPE (High Density Polyethylene) plastic that makes up this pallet is, in contrast to pallets made of PO (Polyolefins) plastic, suitable for humid or even wet environments. This can of course be both indoor and outdoor use. This pallet has a closed deck, which means that it can be easily cleaned through and through and dries relatively quickly. Ideal for, for example, the meat and fish processing industries or other environments where clean or hygienic working conditions are important. It is not for nothing that this pallet is called the hygiene pallet in the sector. The temperature range of this type of plastic is -40 °C to +70 °C.

## Load capacity and weight

The following load capacities are important:

The static load capacity: 4000kg

The dynamic load capacity: 2000kg

The racking / high-bay load capacity: 1000kg

Own weight: 18kg
