### PRODUCT DESCRIPTION

## Heavy pallet of 1200x800x160mm - PP plastic

This robust pallet of 1200x800x160mm (euro format) is made of anthracite PP plastic and has an open deck and 3 slats. Thanks to this combination, it is easy to clean and dry. This pallet is extremely suitable for high rotation and manipulation, can withstand a beating and has double-walled blocks. In addition, it is ideal for use on conveyor belts, roller conveyors and other automated systems.

### Load capacity and weight

The following load capacities are important:

The static load capacity: 4000kg

The dynamic load capacity: 2000kg

The racking / high-bay load capacity: 1000kg

Own weight: 18kg

## Plastic type of pallet

The PP (Polypropylene) plastic that makes up this pallet is, in contrast to pallets made of PO (Polyolefins) plastic, suitable for humid or even wet environments. This can of course be both indoor and outdoor use. This pallet has an open deck, which means that it can be easily cleaned through and through and dries relatively quickly. Ideal for, for example, the meat and fish processing industries or other environments where clean or hygienic working conditions are important. The temperature range of this type of plastic is -15 °C to +55 °C.
