PRODUCT DESCRIPTION

Heavy plastic pallet 1200x1000x150mm - open upper deck with perimeter base

Solid strong plastic pallet, made entirely of PO plastic. The dimensions are 1200x1000x150mm. The pallet has a perimeter base or 5 skids. This lower deck gives extra strength, which has greatly increased the load capacity in a rack. This plastic pallet is immediately ready for export.

The pallet is characterised by its strong structure, with a racking load capacity of 600kg, maximum static load of 4000kg and a maximum

dynamic load of 1750kg. The pallet is also resistant to bacteria, fungi and insects.

Plastic pallets made of PO plastic have a light weight, a good price/quality ratio, but are less suitable for outdoor storage, use in damp rooms or cleaning by water.
