Type	Roll containers

PRODUCT DESCRIPTION

This used isothermal roll container with outer dimensions of 600x800x1670mm and inner dimensions of 430x620x1370mm. The container has a weight of 90 kilograms, a maximum load capacity of 500 kilograms and a capacity of 370 liters. The roll container is ATP certified and has an insulation value of 0.37 W/m 2.K. This means that the container bears the quality mark of the European authority for the international transport of perishable foodstuffs. In addition, the roll

container meets the food safety requirements and the container has the HACCP certificate. The aforementioned properties make this container very suitable for the food and food industry. The container has a smooth inside, there are no racks. In addition, the inside and outside are completely seamless. Furthermore, the roll container has two swivel wheels and two fixed wheels with a diameter of 100 mm. The container is treated against rust and has a quick-closing system. The door has two handles and opens up to 270°. This roll container has an EPDM housing that is made of one piece, so that it is easy to clean and remains hygienic. The EPDM housing also provides a high temperature range and resistance to many bases, acids and salts, extending the life of the container. The cooling and freezing elements are not supplied with the Isotherm roll container as standard. Application Isotherm roll containers are particularly well suited for warehouses and producers with their supply chain active in the food industry. Food distribution is very vulnerable due to the many actions that have to be done, such as loading and unloading at different locations or frequent opening of the vehicle. The isothermal roll container is a very flexible solution and suitable for most logistics companies. They also ensure perfect thermal safety when temporarily storing goods in a cool place, while waiting at the docks of the distribution center and during transport at the right temperature. When using isothermal roll containers you can also simultaneously transport cooled, frozen and dry products. PLEASE NOTE: This is a used item, all used items we sell are 100% functional! However, the photo that we display on the website does not guarantee the entire batch that we have in stock. The used products we sell have visible signs of wear and wear and tear. Based on our more than 30 years of experience, we carefully sort and repair used items. Whether the optical and technical condition is sufficient for you is a personal interpretation.
