PRODUCT DESCRIPTION

Nestable roll container "Multy" 800x640x1600mm has 2 hinged sidewalls and a fixed rear gate. The rolling floor is made of plastic and can be folded up against the rear gate. The inside dimensions are 785x615x1395mm. The weight of this roll container is 48kg and you can store 0.673 of loading volume in this nestable roll container. When it comes to loading capacity, this roll container is strong, you can store or transport 500kg in it. This 3 sided nestable roll container is equipped with a central foot brake. On the back is a notice board of 175x200mm with a plastic cardholder. This 3 sided roll container comes standard with one strap. All metal parts of this nestable roll container are galvanized. The roll container is equipped with 4 wheels with a 125mm rubber tread, with 2 fixed wheels in a cassette and 2 swivel wheels for easy steering.

Cut-outs have been made in the rear gate so that the roll container is comfortable and easy to use. The wheels of this roll container are suitable for use in a freezer room, they are resistant to a temperature up to -40°C . To make optimal use of your transport, it is advisable to opt for this 3-sided roll container, because in a 13.6-meter trailer you can place 57 loaded roll containers, and for empty return transport, it is possible to install 180 in accordance with placing the nestable principle in a 13.6-meter trailer.
