PRODUCT DESCRIPTION

100mm rigid caster with ball-bearing - PP / TPR

One standard wheel for roll containers which has a loading capacity of 135kg, and is therefore suitable for a normal load. This fixed castor has a self-weight of 0,65kg and is made of a gray PP plastic core and a gray TPR tread. TPR stands for thermoplastic rubber, it is sound-absorbing, but not such as in a rubber tread. The bearing of the wheel is a ball bearing. Temperature range in which the wheel can be used is -6 & deg; C to + 80 & deg; C The hole pattern has dimensions 80x60mm, provided with holes for bolts 9 mm. NOTE: Maximum load capacity of four wheels is however approximately 500kg frame of the cart must also be suitable for 500kg
