**PRODUCT DESCRIPTION**

**Fixed castor - 100 mm in diameter  
Sound-absorbing h1>**

**Description**  
A roller bearing provided with a fixed castor thermoplastic rubber tread. The tread has a gray color. Thanks to the material of the running surface, this wheel is sound-damping. The wheel is often used in low-noise environments such as hospitals. The core of the wheel is made up of polypropylene,

as well as having a gray color. The rigid caster can withstand loads of up to 100 kilograms. The hole pattern has dimensions 80x60 millimeter by 9 millimeter bolts. Thanks to this hole pattern this wheel fits most trolleys, it is a standard hole pattern. The wheel makes it possible streaks on the surface. The wheel is suitable for placement in cooling cells, the wheel is not suitable to be placed in freezers.
