PRODUCT DESCRIPTION

A strong wheel for roll containers that has a load capacity of 150kg and is, therefore, suitable for medium loads. This castor has its own weight of 1.5kg and is made of white PP plastic, both the core and the tread of the castor are made of PP.

The bearing of the wheel is a roller bearing.

The temperature range in which the wheel can be used is -20°C to +60°C

The hole pattern has dimensions of 80x60mm, with holes for 9mm bolts.

NOTE: Maximum load capacity of 4 wheels is approximately 600 kg, however, the frame of the roll container must also be suitable for 600 kg
