**PRODUCT DESCRIPTION**

This heavy duty fixed castor has a load capacity of 250 kg and a diameter of 100 mm. The fixed castor is made of a gray aluminum core with a brown polyurethane tread. Thanks to the material of the core, it is a very strong and durable wheel. In addition, the wheel is streak-free and sound dampening! The weight of this wheel is 1.60 kg. The bearing of the wheel is a double ball bearing and the wheel is provided with a housing and mounting plate. The bottom plate has a hole pattern of 105 x 80/52 mm, intended for M 8 bolts. Temperature range of the fixed castor is -20 °C to + 60 °C. The wheels of LogistiekOnline can be combined with various types of roll containers and dollies . Would you like to know more about the different types of roll container wheels and applications or tips when purchasing ? Then read our blog!
