### PRODUCT DESCRIPTION

All-metal 3-witch Euro pallet Rolling container 1350x950x1820mm with 4 125mm swivel castors, 2 with brakes, shelves are available separately. The inside dimensions of this roll container are 1298x887x1605mm. The unit weight is 68.8kg. This euro pallet roll container can be dismantled by releasing the 8 clips that secure the rear gate to the side rails. The side gates are placed in the ground as push-in gates. This construction allows you to save space when the roll container is in storage or during return

transport when it is not in use. The tubes of this roll container are 50x20 mm, which means that the capacity of this roll container is 800kg. The 125 mm casters are equipped with roller bearings and have a black PA core and a grey elastic rubber tread. Both side gates and the rear gate consist of a tubular frame of 22mm diameter with wire mesh meshes of 50x50x4mm. This roll container can be fitted with any wheel from our range at your request, for example with a brake, suitable for freezer or both. A sound-absorbing softer rubber wheel with or without a brake, it's all possible.
