PRODUCT DESCRIPTION

A strong transport wheel that has a load capacity of 400 kg. This makes it extremely suitable for both light and medium-heavy transport, even on less slippery floors! The wheel tread is made of cast polyurethane (PU) with a cast iron core (painted black). The hardness of the tread is 90° - 98° Sh.A (HARD). As a result, the castor wheel guarantees low rolling resistance and low-noise running. In addition, this castor wheel is wear-resistant and streak-free. The wheel comes with mounting plate with the dimensions 105 x 86 mm. The axle hole diameter is 20 mm and the overall height of the castor wheel is 156 mm. This wheel has a tread width of 40 mm and the center distance of the mounting holes is 82/77 x 60 mm. The diameter of the mounting holes is 9 mm and the dimension of the inner fork width is 50 mm. The material of the fork (type: MD50) consists of galvanized steel. The weight of the castor wheel is 2.41 kg and the temperature range of the wheel is -30°C to +80°C.

The construction is equipped with a central kingpin, making it very suitable for regular peak loads! These castor wheels with polyurethane tread are suitable as an alternative to vulcanized natural rubber when certain chemicals, oils and greases play a role. In addition, this wheel can be mounted under every roll container and dolly in our range. Would you like to learn more about points to consider when buying wheels?
