**PRODUCT DESCRIPTION**

A strong fixed castor that has a load capacity of 500 kg, making it suitable for both light and heavy transport. The wheel tread is made of cast polyurethane (PU) with a cast iron core (painted blue). The hardness of the tread is 90° - 98° Sh.A (HARD). As a result, the fixed castor guarantees low rolling resistance and low-noise running. In addition, this wheel is wear-resistant and streak-free. The wheel comes with mounting plate with the dimensions 135 x 110 mm. The axle hole diameter is 20 mm and the construction height of the fixed castor is 190 mm. This wheel has a tread width of 50 mm and the center distance of the mounting holes is 105 x 80/75 mm. The diameter of the mounting holes is 11 mm and the dimension of the inner fork width is 63.5 mm. The material of the fork (type: MD50) consists of galvanized steel. The weight of the fixed wheel is 4.26 kg and the temperature range of the wheel is -20°C to +70°C. The construction is very suitable for regular

peak loads! These fixed castors with a polyurethane tread are suitable as an alternative to vulcanized natural rubber when certain chemicals, oils and greases play a role. In addition, this wheel can be mounted under every roll container and dolly in our range. Would you like to learn more about points to consider when buying wheels?
