PRODUCT DESCRIPTION

A strong transport wheel that has a load capacity of 700 kg. This makes it extremely suitable for both light and heavy transport, even on less slippery floors! The wheel tread is made of cast polyurethane (PU) with a cast iron core (painted blue). The hardness of the tread is 90° - 98° Sh.A (HARD). As a result, the fixed castor guarantees low rolling resistance and low-noise running. The wheel is also wear-resistant and streak-free. The wheel comes with mounting plate with the dimensions 135 x 110 mm. The bore diameter is 20 mm and the construction height of the fixed castor is 238 mm. This wheel has a tread width of 50 mm, the center distance of the mounting holes is 105 x 80/75 mm. The weight of the fixed castor is 5.55 kg and the temperature range of the wheel is -20° C to +80° C. The material of the fork (type: MD70) consists of galvanized steel. In addition, this wheel can be mounted under every roll container and dolly in our range. These heavy duty fixed castors with

polyurethane tread are suitable as an alternative to vulcanised natural rubber when certain chemicals, oils and greases play a role. When purchasing wheels, you can take into account various points, so that you purchase the right wheels with the properties you are looking for!
