PRODUCT DESCRIPTION

A strong transport wheel with plate attachment that has a load capacity of 500 kg. The caster wheel tread is made of nylon, the tread hardness is 70° ±5° Sh.D (EXTRA HARD). This makes it extremely suitable for heavy transport on smooth floors without barriers and dirt! The wheel is wear-resistant, shock-resistant and also equipped with a foot brake at the rear! The wheel comes with mounting plate with the dimensions 105 x 86 mm. The axle hole diameter is 15 mm and the overall height of the castor wheel is 130 mm. This wheel has a tread width of 38 mm and the center distance of the mounting holes is 82/77 x 60 mm. The diameter of the mounting holes is 9 mm and the dimension of the inner fork width is 50 mm. The construction of the castor wheel has a central kingpin, making it very suitable for regular peak loads! The weight of this castor

wheel is only 0.83 kg. The material of the fork (type: MD50) consists of galvanized steel. The material of the castor wheel consists of plastic polyamide and the temperature range is -30°C to $+80^{\circ}\text{C}$. In addition, this wheel can be mounted under every roll container and dolly in our range. Would you like to learn more about the different types of wheels from LogistiekOnline?
