PRODUCT DESCRIPTION

A strong transport wheel that has a load capacity of 700 kg. The tread of the wheel is made of nylon, the hardness of the tread is 70° ±5° Sh.D (EXTRA HARD). This makes it extremely suitable for heavy transport on smooth floors. The wheel is wear-resistant, shock-resistant and streak-free! The wheel comes with mounting plate with the dimensions 135 x 110 mm. The bore diameter is 20 mm and the height of the fixed castor is 190 mm. This wheel has a tread width of 50 mm and the center distance of the mounting holes is 105 x 80/75 mm. The own weight of this fixed castor is 2.03 kg. In addition, this wheel can be mounted under every roll container and dolly in our range. The material of the fork (type: MD70) consists of galvanized steel. The material of the fixed castor consists of plastic polyamide and the temperature range of the wheel is -30°C to +80°C. LogistiekOnline has a wide range of roll container

wheels. The suitable wheel can contribute to a smooth and easy logistics process, view our blog about buying tips here !
