PRODUCT DESCRIPTION

A strong transport wheel with plate attachment that has a load capacity of 800 kg. The caster wheel tread is made of nylon, the tread hardness is 70° ±5° Sh.D (EXTRA HARD). This makes it extremely suitable for heavy transport on smooth floors without barriers and dirt! This swivel castor is also resistant to lateral peak loads. The wheel is wear-resistant, shock-resistant and also equipped with a foot brake at the rear! The wheel comes with mounting plate with the dimensions 105 x 86 mm. The axle hole diameter is 20 mm and the overall height of the castor wheel is 165 mm. The tread width is 45 mm and the center distance of the mounting holes is 80/77 x 60 mm. The diameter of the mounting holes is 9 mm and the dimension of the inner fork width is 50 mm. The construction of the castor wheel has a central kingpin, making it very

suitable for regular peak loads! The weight of this swivel castor with brake is 2.69 kg. In addition, this wheel can be mounted under every roll container and dolly in our range. The material of the fork (type: HD80) consists of galvanized steel. The material of the castor is made of high-quality polyamide (cast nylon) and the temperature range is -30°C to $+80^{\circ}\text{C}$. When purchasing wheels, you can take into account various points that can greatly increase the ease of use and applications of a roll container. Would you like to learn more about these points of interest? Then read our blog with tips when purchasing !
