

**Fixed castor elastic rubber Ø 160 mm - with ball bearing, 400 kg**

SKU 48472

This fixed castor has a ball bearing with a diameter of 160 mm. The tread consists of vulcanized black elastic natural rubber and partly due to the low-noise running, this wheel meets the highest ergonomic standards! Load capacity up to 400 kg.

**TECHNICAL DATA**

<b>Castors diameter mm</b>	160
<b>Material</b>	Rubber
<b>Status</b>	New
<b>Outside dimension length</b>	160
<b>Outside dimension width</b>	50
<b>Outside dimension height</b>	195
<b>Carry weight</b>	400
<b>Product</b>	new
<b>Type</b>	Wheels

**PRODUCT DESCRIPTION**

A strong transport wheel with plate attachment that has a load capacity of 400 kg. The tread of the wheel is made of vulcanised black elastic natural rubber, the hardness of the tread is 65° - 75° Sh.A (COMFORT). The tread is very wear-resistant and the adhesion to the core is perfect. Because the tread is very elastic, the rolling properties are excellent even under maximum load. The aluminum core also makes the wheel resistant to peak loads. The wheel comes with mounting plate with the dimensions 135 x 110 mm. The bore diameter is 20 mm and the construction height of the fixed castor is 195 mm. This wheel has a tread width of 50 mm and the center distance of the mounting holes is 105 x 80/75 mm. The diameter of the mounting holes is 11 mm and the dimension of the inner fork width is 63.5 mm. The construction of the

fixed castor is very suitable for regular peak loads! The dead weight of the fixed castor is 2.21 kg. In addition, this wheel can be mounted under every roll container and dolly in our range. The material of the fork (type: MD50) consists of galvanized steel and the temperature range is -20° C to + 70° C. This fixed castor is very suitable for use on moderate surfaces. Would you like to know more about the different types of container wheels and tips when purchasing? Then read our blog about roll container wheels !
