

Swivel castor elastic rubber Ø 200 mm - with ball bearing and brake, 500 kg

SKU 48477

This swivel castor with brake is equipped with a ball bearing with a diameter of 200 mm. The tread consists of unvulcanized black elastic natural rubber and partly due to the low-noise running, this wheel meets the highest ergonomic standards!

TECHNICAL DATA

Castors diameter mm	200
Material	Rubber
Status	New
Outside dimension length	200
Outside dimension width	50
Outside dimension height	238
Carry weight	500
Product	new
Type	Wheels

PRODUCT DESCRIPTION

A strong transport wheel with brake and plate attachment that has a load capacity of 500 kg. The tread of the wheel consists of vulcanised black elastic natural rubber with smooth running compound and the hardness of the tread is 65° - 75° Sh.A (COMFORT). The tread is very wear resistant and the adhesion to the core is perfect. Because the tread is very elastic, the rolling properties are excellent even under maximum load. The aluminum core also makes the wheel resistant to peak loads. The wheel comes with mounting plate with the dimensions 135 x 110 mm. The axle hole diameter is 20 mm and the overall height of the castor wheel is 238 mm. This wheel has a tread width of 50 mm and the center distance of the mounting holes is 105 x 80/75 mm. The diameter of the mounting holes is 11 mm and the dimension of the inner fork

width is 63.5 mm. The construction of the castor wheel has a central kingpin, making it very suitable for regular peak loads! The weight of the castor wheel is 3.55 kg. In addition, this wheel can be mounted under every roll container and dolly in our range. The material of the fork (type: MD50) consists of galvanized steel and the temperature range is -20° C to + 70° C. This swivel castor is suitable for heavier transport vehicles or containers, such as waste containers. Wheels are available in various shapes and sizes for different applications, so read more about tips here when purchasing!
