**PRODUCT DESCRIPTION**

A strong transport wheel that has a load capacity of 400 kg. The wheel tread is made of vulcanised black elastic natural rubber and the tread hardness is 65° - 75° Sh.A (COMFORT). The tread is very wear resistant and the adhesion to the core is perfect. Because the tread is very elastic, the rolling properties are excellent even under maximum load. In addition, this wheel is streak-free! The axle hole diameter of the transport wheel is 20 mm and the tread width is 50 mm. The diameter of the ball bearing fit is 47mm and the depth is 17mm. The installation length of the wheel is 54 mm. The hub diameter of the transport wheel is 63 mm and the hub length is 60 mm. The core (core diameter is 140 mm) of the transport wheel consists of high-quality polyamide and the temperature range is -20° C to + 70° C. Its own weight is 1.43 kg. In

In addition, this wheel can be mounted under every roll container and dolly in our range. This wheel is very suitable for use on moderate to poor ground. Application takes place under roll containers, industrial waste containers and other means of transport that are frequently and long-term loaded. The wheel is also specially designed and suitable for mounting ball bearings with an extra splash-proof seal in order to additionally guarantee lifespan, hygiene and maintenance-free use. Wheels are available in various shapes and sizes for different applications, so read more about tips here when purchasing!
