PRODUCT DESCRIPTION

Storage roll container type furniture corlette, with a size of 1200 x 800 x 1850 mm and a load capacity of 800 kg. The internal dimensions are 1120 x 750 x 1615 mm. The container can be used, for example, for the storage and transport of furniture, but also for other large items. This roll container is suitable for transport in trucks, where the corlettes can be placed against each other in width for extra stability. The container has a

mesh wall with holes of 50 x 100 mm. The roll container has specially shaped side frames, so that several can be stacked on top of each other. A maximum of three pieces can be stacked, whereby the lower container can carry a maximum of 1000 kg, so a load of 1000 kg. The bottom of the roll container has a chipboard of 16 mm thickness and is fitted with plastic polyamide (PA) castors with a diameter of 125 mm. One of the wheels has a directional lock, to make driving straight ahead easy, if desired. The storage roll container is also nestable in an L-shape and therefore takes up little space when stored when not in use. The own weight of the container is 79 kg. If you want to learn more about our corlettes, it might be useful to read our blog with information about the furniture corlette !
