PRODUCT DESCRIPTION

Storage roll container, furniture corlette type with a size of 2400 x 1150 x 1850 mm. The internal dimensions are 2320 x 1100 x 1615 mm. This corlette is very suitable for furniture storage and transport, but can actually be used for all large items with a lot of volume. These roll containers are suitable for transport in trucks, where they can be placed 2 by 2 lengthways against each other, for extra stability. The roll

container has specially shaped side frames, so that several can be stacked on top of each other. A maximum of three pieces can be stacked, whereby the lower container can carry a maximum of 1000 kg, in other words a maximum load of 1000 kg. The bottom of the roll container has a chipboard of 16 mm thickness and is fitted with plastic polyamide (PA) castors with a diameter of 125 mm. The storage roll container is also collapsible and space-saving to store when not in use, by nesting it in an L-shape. The own weight of this container is 121 kg. If you want to learn more about our corlettes, it might be useful to read our blog with information about the furniture corlette !
