PRODUCT DESCRIPTION

Blocking island for Danish cart / flower cart

As you know, our Danish cart runs smoothly. However, if you want to stop or secure the Danish cart, the blocking island for the Danish cart is the perfect solution for this. With the blocking island you secure the Danish cart to the ground. The blocking island for the Danish cart is often used in garden centers and showrooms, where the Danish cart is used as a rack.

The blocking island for the Danish trolley is made of galvanized metal, which makes the product rust-resistant. The blocking island has a diameter of 285mm and a weight of 1.6kg. Anti-slip strips are attached under the blocking island, so that the blocking island remains in the desired place. The blocking island is preferably to be used on a paved surface.
