Demountable Post Pallet with Multiplex Base - 1850x1035x310mm - Double Base

SKU 50210

Demountable Post Pallet stacking rack hot-dip galvanized, suitable for transporting and storing pallets. The inside dimensions are 1850x1035x310mm.

TECHNICAL DATA

Material	Metal
Bottom	Solid
Inside dimension length	1850
Inside dimension width	1005
Inside dimension height	310
Outside dimension length	2025
Outside dimension width	1180
Outside dimension height	310
Dynamic load	2000
Type	Double Mobilrack

PRODUCT DESCRIPTION

DEMOUNTABLE POST PALLET WITH MULTIPLEX BASE - 1850X1035X310MM - DOUBLE BASE

Demountable post pallets, also known as Mobile Racks are suitable for transporting and storing pallets and large products. The inside dimensions are 1850x1035x310mm. This is a very flexible system that fits in with seasonal peaks. Setting up extra storage capacity is quickly and easily arranged with these stacking racks when needed. Because these mobile racks are hot-dip galvanized, rust formation is prevented,

they are scratch-resistant and more robust. This stacking rack does not include tubes, the tubes at the corners of the stacking rack are available in several standard heights. Depending on the stacking height, the load capacity varies between 1500 and 2000 kilograms per post pallet rack, the weight of this stacking rack is 62.5 kilograms.

If you want to stack two demountable post pallets on top of each other, keep in mind that the gap between two stacking racks is the length of the tube minus 8cm. This gap is created because the tube slightly sinks into the rack that stands on the floor and the rack that is stacked on it slides slightly over the tube.
