Status	New
Bottom	Perforated
Outside dimension length	950
Outside dimension width	950
Outside dimension height	310
Carry weight	1200 kg
Type	Big-bag rack

PRODUCT DESCRIPTION

Galvanized Big Bag stacking rack 950x950x310mm

Galvanized stacking rack, suitable for transport and storage of big bags. Outside dimensions are 1120x1120x310mm. This is a very flexible system that suits seasonal peaks. The creation of additional storage is needed to this easily controlled with this stack racks. Because these big bag racks are galvanized corrosion is prevented, they are scratch resistant and stronger. This stacking rack consisting of a base and the upper frame is exclusive of tubes, the tubes at the corners of the stacking rack are available in several standard heights. Depending on the stack height varies the load capacity between 2,000 and 1,500 kilograms per big bag rack, the weight of the big bag stacking rack is 40 kg. When

you stretch a base and a top frame of the big bag like with tubes in our range on each pile, you must take into account that the gap between the base and top frame of the big bag stretching the length of the tube is minus 8 centimeter. This intermediate space is created in that the tube slightly lowered in the rack which is standing on the ground, and the rack which stacked thereon slide back slightly over the tube.
