TECHNICAL DATA

Material	Metal
Status	New
Outside dimension length	2343
Outside dimension width	1078
Outside dimension height	787
Carry weight	300
Type	Tyre racks

PRODUCT DESCRIPTION

These handy storage racks for car tyres are foldable and stackable. The racks can be stacked up to 9 pieces high when they are filled with tyres. When folded, then the racks can be stacked in piles up to 32 pieces high. It's very easy to move the racks with a forklift. The tyre racks are powder coated in the RAL colour 5010. The racks have removable brackets, removable or fixed sidewalls. The load capacity of this storage rack is 300kg. The weight of the rack is 75kg. The storage racks can be accessed from four sides with a forklift. A maximum of 28 tyres fit into a rack (based on a tyre maximum size of 16-inch diameter). A truck with a capacity of 120 can carry 210 pieces. The total capacity for tyre storage is huge, in contrast to tyre racks that are not stackable. Any other type of tyre rack will not be able to quickly accommodate 252 tires (9 layers times 28 pieces) in total. Truly a super-efficient way to store tyres.
