<b>Product</b>	new
<b>Type</b>	Small parts storage bins

**PRODUCT DESCRIPTION**

Storage system for storage bins with dimensions 1150x850x1530 mm. The metal baking rack is double-sided and can therefore be accessed from two sides. In addition, it has four wheels for easy placement at the location of your choice. Very useful in industries or other environments where it is important to have a range of small and medium items on hand for immediate processing. A single sided version is also available with legs instead of wheels, ideal for wall mounting in a garage or warehouse. The bin cabinet comes with 118 storage bins in various sizes (see picture). In this way, small goods such as screws or bolts remain sorted and slightly larger materials, such as those often used in the automotive industry, are also easily accessible when they are sorted and stored. PLEASE NOTE: the color layout of the bins may differ from the photos.
