PRODUCT DESCRIPTION

Plastic Pallet Box - 1200x1000x975mm - Foldable

This collapsible pallet box for heavy industrial use is ideal for storing goods in bulk, partly thanks to 4 doors on the side that give easy access

to the box. The outside dimensions are 1200x1000x975mm and the inside dimensions are 1115x915x790mm. The capacity is 814 litres with a maximum loading weight of 1000kg. The dimensions are 1200x1000x400mm when folded. During transport, the maximum stacking height with unfolded and loaded pallet boxes is 3 units (up to 2000kg weight on the bottom box), folded pallet boxes during return transport can be stacked up to 7 pieces high. With static storage, the maximum stacking height for loaded pallet boxes is 5 (up to 4000kg on the bottom box), folded pallet boxes can be stacked up to 15 pieces high. The pallet box has a weight of 57kg. The box is extremely strong and therefore suitable for heavy industrial use, gives excellent protection, is accessible from four sides with a forklift or pallet truck and gives extra flexibility in handling. The temperature range is between -20°C and 40°C.
