PRODUCT DESCRIPTION

Nestable and a stackable plastic container with a 2-part hinged lid. The container has the outside dimensions of 600x400x516mm and the inside dimensions of 540x367x498mm. The sidewalls and the base of the container are completely closed with a capacity of 95 litres. The carrying capacity of this box is 25kg. And you can stack up to 4 loaded containers on top of each other, the load capacity of the stack is 100kg. This box can be used within a temperature range of -20°C to + 40°C When the lid is closed you can stack the boxes and with an open lid, these plastic boxes can be nested, saving you space during transport or storage. The space-saving is then around 83% when the boxes are

nested. The most efficient way to transport these boxes is to place 96 plastic containers on 1 pallet of 1200x900x2550mm. This way 2112 pieces will fit in a trailer.
