Type	Nesting boxes, Distribution boxes

PRODUCT DESCRIPTION

Plastic nesting container, riser 1160x480x342mm

High quality plastic container for transporting goods. Capacity 130Litres. Made of durable plastic, it offers a considerable amount of space.

Nested design, additional metal risers

The nested design of the plastic container allows stacking when the container is empty. Thanks to additional metal arches, it is also possible to stack the containers on top of each other - piledriving - even when

they are full of goods. Thanks to extendable arches and special ribbing in the base, the container placed on top stabilizes in the exact position. By folding down the risers, empty containers can be nested to save storage space

Ideal for transportation during a move

This large plastic container is a great solution during moves in offices, libraries, warehouses or schools. The 1m long base area provides great space for transporting binders, folders, documents and other office equipment.
