PRODUCT DESCRIPTION

RL-KLT 3147 storage bin made of plastic is an extra strong bin with reinforced walls and 4 holes in the bottom. This makes it extremely suitable for the heavier industry such as the automotive / automobile industry. The outside dimensions are 297x198x147.5mm and the inside dimensions are 243x162x129.5mm according to VDA standard. The capacity of this RL-KLT 3147 stacking bin is 8.67 liters. The vertical ribs on the walls make this RL-KLT 3147 stacking bin more robust than regular Euro standard stacking bins and makes it easy to grab and pull in automated logistics systems. The RL-KLT 3147 stacking bin has a smooth bottom with 4 holes and is easy to clean. This KLT container is stackable and on one short side the container is provided with a label

holder For transport and storage, it is the most efficient way to place 272 RL-KLT 3147 stacking bins on 1 pallet of 1200x800x2550mm. This way 8160 pieces fit in a trailer.
