PRODUCT DESCRIPTION

Prestar Worktainer 800x600x1700mm

This Prestar worktainer has a plastic base and is foldable in L-shape. If he has folded, you can slide it nestable with other trolleys of this type. This unique design allows you to save space when the worktainer is in storage or during return transport when not in use. On the front is the worktainer provided with a steel tube which can be attached to the side rails to each other, and that provides extra stability and makes the structure more strongly than other 3-witch roll containers which are only provided with roller container binders. There are also shelves for the trolley separately
