PRODUCT DESCRIPTION

New collapsible wire container 1200x1000x1200mm

This metal wire collapsible container has the outside dimensions and the inner 1200x1000x1200mm sizes are 1160x960x1020mm. This wire container has a carrying capacity of 600kg. The metal is electrolytically galvanized. These wire collapsible container is provided with the first

wing frame on the long side, and they are mutually stackable. Because the wire container is collapsible you can save a lot of space during return transport or if they are in storage when not in use. The collapsed height is 360mm. you can stack eight folded wire containers on a pile of 2600mm. This wire containers are, inter alia, used in the automotive industry, mussel farms, and they are perfectly suitable for the storage of items such as production waste, parts and components for the manufacturing for cars. This wire container has a practical design and is highly resistant to damage.
