PRODUCT DESCRIPTION

**New collapsible wire container 1200x1000x1000mm**

This metal wire collapsible container has the outside dimensions 1200x1000x1000mm and sizes as well as within 1126x969x872mm. The maximum load 500kg. The metal is electrolytically galvanized. These wire collapsible container is provided with the first wing frame on the long side, and they are mutually stackable. If you have loaded the wire containers can have four stacking the maximum load capacity of 500kg.

When empty containers wire folded stack would be you can stack them one on one only, so no more than two layers. Because the wire container is collapsible you can save a lot of space during return transport or if they are in storage when not in use. The collapsed height is 360mm. you can stack 9 folded wire containers on a pile of 2395mm. This wire containers are, inter alia, used in the automotive industry, mussel farms, and they are perfectly suitable for the storage of items such as production waste, parts and components for the manufacturing for cars. This wire container has a practical design and is highly resistant to damage.
