### PRODUCT DESCRIPTION

Isothermal roll container with outside dimensions 715x810x1900mm and the inside dimensions are 550x640x1600mm. This isothermal container is equipped with a steel stainless steel frame in the bottom with 2 fixed castors and 2 swivel castors of 100mm, the own weight of the isothermal roll container is 100kg. This isothermal roll container has a one-piece

## PRODUCT SPECIFICATION SHEET

EPDM housing so that it is easy to clean and remains hygienic because there are no grooves and seams. The EPDM housing contains PU insulation foam with a heat conductivity coefficient of 0.39 W / m<sup>2</sup>.k. Note: The cooling and freezing elements are NOT supplied as standard with the Isotherm roll container. You can buy these elements separately.

### APPLICATION

Isothermal roll containers are particularly suitable for warehouses and producers who are active in the food industry with their supply chain. Food distribution is very vulnerable due to the many actions that need to be done, such as loading and unloading at different locations or the frequent opening of the vehicle. The isothermal roll container is a very flexible solution and suitable for most logistics companies. They also assure you of a perfect thermal safety when temporarily storing goods, while waiting at the docks of the distribution centre and transport at the right temperature. When using isothermal roll containers, you can also transport refrigerated, frozen and dry products at the same time.

NOTE: This is a used item, all used items that we sell are 100% functional. However, the photo that we display on the website does not guarantee the entire batch that we have in stock. The used products that we sell have visible traces of wear. Based on our more than 30 years of experience, we carefully sort and repair used items. When placing your order online you agree to the condition of the used products.
